

HEALTHIER FOOD FOR MORE PEOPLE

About SWIGATO: Our technology platform connects customers, restaurant partners and delivery partners, serving their multiple needs. Customers use our platform to search and discover restaurants, read and write customer generated reviews and view and upload photos, order food delivery, book a table and make payments while dining-out at restaurants. On the other hand, we provide restaurant partners with industry-specific marketing tools which enable them to engage and acquire customers to grow their business while also providing a reliable and efficient last mile delivery service. We also operate a one-stop procurement solution, Hyper pure, which supplies high quality ingredients and kitchen products to restaurant partners. We also provide our delivery partners with transparent and flexible earning opportunities.

Concerns: Our major concern is to provide everyone with more specific search by initiating an AI chatbot which not only will optimize the user search, also will enable user to make more healthier, calorie specific, top rated, seasonal and moody choices.

CraveX: An AI chatbot integrated with generative AI technology, designed to revolutionize food delivery apps by optimizing user search results and enhancing the ordering experience. What makes CraveX special is its ability to understand user preferences in real-time, providing personalized food suggestions based on previous orders, dietary preferences, and even mood. It leverages natural language processing (NLP) to engage users in conversational queries, helping them quickly find dishes or restaurants that match their cravings. CraveX's requirements include seamless integration with the app's backend, robust AI algorithms to handle vast data, and continuous learning to refine recommendations, ensuring that users can effortlessly order their favorite meals on the go.
